The interim condensed consolidated financial information of OJSC TransContainer, its subsidiaries and its joint ventures (the “Group”) as at 31 March 2012 and for the three-month period then ended was authorized for issue by the General Director of the Company on 25 June 2012.

OJSC TRANSCONTAINER
NOTES TO THE INTERIM CONDENSED CONSOLIDATED FINANCIAL INFORMATION
FOR THE THREE-MONTH PERIOD ENDED 31 MARCH 2012 (UNAUDITED)
(Amounts in millions of Russian Roubles, unless otherwise stated below)

2. BASIS OF PRESENTATION OF FINANCIAL INFORMATION

Statement of compliance – The annual financial statements of OJSC TransContainer are prepared in accordance with International Financial Reporting Standards (“IFRS”). This interim condensed consolidated financial information has been prepared in accordance with International Accounting Standard (“IAS”) 34, “Interim financial reporting”.

The consolidated statement of financial position as at 31 December 2011, included in this interim condensed consolidated financial information, has been derived from the audited consolidated financial statements of the Group for the year ended 31 December 2011. This interim condensed consolidated financial information should be read in conjunction with the audited annual consolidated financial statements.

Significant accounting policies – Except as discussed below, the accounting policies adopted in the preparation of the interim condensed consolidated financial information are consistent with those used in the preparation of the Group’s annual financial statements as at 31 December 2011 and for the year then ended, as described in those annual consolidated financial statements.

Taxes on income in the interim periods are accrued using the tax rate that would be applicable to expected total annual profit or loss.

Estimates – The preparation of interim condensed consolidated financial information requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

Revenue from integrated freight forwarding and logistics services – There are two types of the Company’s services for which critical accounting judgments are involved in revenue recognition:

1) In case the Company provides integrated freight forwarding and logistic services the customers do not interact with other transportation organisations. A full service is charged by the Company to its customers for its services including rail-based container transportation, terminal handling, trucking, etc. and the full third-party charges, including railway tariff.

There are certain characteristics indicating that the Company is acting as an agent, particularly the fact that railway tariffs are available to the public, therefore are known to the customer, and the risk of delivery is borne by the transportation organisations.

However, the Company bears the credit risk and controls the flow of receipts and payments and is independent in its own pricing policy.

Management believes that the Company acts as a principal in these arrangements and the Company accounts for receipts from customers as sales revenue. Third-party charges, including the railroad tariff is included in third-party charges relating to integrated freight forwarding and logistics services.

Had the railway tariff directly attributable to such services been excluded from revenue and expenses both would have decreased by RUR 2,081m for the three-month period ended 31 March 2012 (RUR 1,998m for the three-month period ended 31 March 2011).

2) In cases where Rail-based container shipping services are provided, the Company agrees with the customer the transport fee as above, excluding the railroad tariff which is paid by the Company and re invoiced to the client as reimbursement of rail infrastructure and locomotive services. Management believes that railroad tariff should not be included in revenue and expenses, as any variation in the tariff will be borne by the client.

In preparing this interim condensed consolidated financial information, the significant judgements made by management in applying the group’s accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements for the year ended 31 December 2011, with the exception of changes in estimates that are required in determining the provision for income taxes (see above).

NOTES TO THE INTERIM CONDENSED CONSOLIDATED FINANCIAL INFORMATION
FOR THE THREE-MONTH PERIOD ENDED 31 MARCH 2012 (UNAUDITED)
(Amounts in millions of Russian Roubles, unless otherwise stated below)

2. BASIS OF PRESENTATION OF FINANCIAL INFORMATION (CONTINUED)

Seasonality – The business of the Group is subject to significant seasonal fluctuations. Revenue and income from current operations are affected by such factors as river transport seasonality, the summer shipping season (for Northern regions) and consumer market cycles. Typically, the number of orders received between January and February is below the annual average. To mitigate the impact of seasonal swings, during the low season, the Group offers its clients favourable tariffs and seeks to schedule flatcars and containers maintenance and repair. In accordance with IFRS, revenue and the related expenses are recognized in the period in which they are realized and incurred respectively. The Group's results for the interim period do not necessarily reflect a continuing trend which will be reflected in the year-end results. In the financial year ended 31 December 2011, 21% of revenues accumulated in the first quarter of the year, with 79% accumulating in the subsequent three quarters.

JSC Kedentransservice entered into five lease agreements dated 1 January 2011 according to which the lessor is KTZ, the second shareholder of Kedentransservice. According to these agreements the Company leases five loading platforms at Dostyk Station.

The rent under these agreements is several times below a market indicator and also is preferential owing to the fact that the Company and the lessor are related parties that leads to annual economy of expenses for the Company during the period of agreement validity (15 years).

Thus, according to IFRS 3 the five lease agreements with KTZ as at the date of acquisition of JSC Kedentransservice have been identified as intangible asset as these agreements bring the Company an additional benefit. As at 31 March 2012 the carrying value of intangible asset under lease arrangements amounted to RUR 523m.
