

Calculation of charge for changing the Depot of empty container drop-off

In case the Customer needs to change the Depot of containers drop-off and PJSC TransContainer has no objections, the Customer shall pay charge for changing the Depot in the amount calculated according to the following formula:

$$C = C_{DF} - C_{DP} , \text{ where}$$

C – charge rate for changing Depot of empty container drop-off; $C \geq 0$;

C_{DF} - contingent rate of container drop-off at actual Depot of container drop-off;

C_{DP} - contingent rate of container drop-off at planned (set within the framework of the approved order) Depot of container drop-off.
